Why “Marking as Received” is the riskiest click in Shopify.

SB @NC_Logistics_Guy

The Scenario

- You order 100 units.
- The supplier ships 92.
- You receive 92.
- You close the PO.

100 → 92

SB

@NC_Logistics_Guy

The Problem

- The original '100' effectively vanishes.
- Your audit trail is gone.
- Your supplier fill-rate data is ruined.
- You're left chasing “Ghost Inventory”.

SB @NC_Logistics_Guy

The Stock Buddy Way

We keep the “Ordered vs. Received” data locked. You see the gap, track the backorder, and hold suppliers accountable. Truth over convenience.

Stop Losing Track of Inventory

12 Beta spots are open for Shopify merchants who are tired of spreadsheets and "Ghost Inventory."

Comment "GAP" to see the technical roadmap and claim your spot.
